

Project 1 Proposal

Select Project Idea (have backups)

1) Professional Sports team performance when compared to salary cap usage or over-usage

2) Top performing song data

3) Sports (Homefield or rivalries)

Research Datasets (have backups)

Data will be pulled from reference statistical websites compiled for each respective league

[1/3] <https://www.hockey-reference.com/>

<https://www.pro-football-reference.com/years/>

<https://www.baseball-reference.com/leagues/>]

2) <https://billboard.elpee.jp/hot100/year/2016>

Perform EDA

1) Sports Data: performance based on salary cap usage

2) Songs: Spotify data vs Billboard (preference changes over time)

Create GitHub Repo and Add Collaborators (don't forget .gitignore)

Create Proposal and Place in GitHub Repo (main branch)

Submit GitHub URL to this channel before leaving for tonight

Have a great night and weekend! :-)
